

Shade outside. Comfort inside.

Made to measure for windows, glass facades & pergolas

ZIP 2.0

Two cassette sizes. More mounting options.

Architectural flexibility.

A refined exterior shade for window facades, with mounting options to suit different building conditions.

- 110 mm or 150 mm cassette options.
- Patented gliders for smooth fabric winding.
- Adjustable guide rails; easy service access.

FLEXIBLE FACADE MOUNTING

Choose direct installation, offset mounting with plates or spacers, or rear-insulation options on selected models.

Wind resistance: up to WRC 3 (type S) or WRC 6 (type M), by configuration.

SIZE RANGE / ZIP 2

Up to 4.8 m wide / 6 m high

Approx. 189 in wide / 236 in high

ZIP 6

Wider spans. One streamlined cassette.

A consistent look at larger scales.

A clean, consistent look for large glass facades and pergolas, even when window widths vary.

- One slim 110 mm cassette across all widths.
- Compensating device from 4 m widths.
- Clip-in fabric technology for easy changes.

SOLAR-CHARGED BATTERY

OPTION AVAILABLE ON ZIP 6

A solar panel recharges the battery inside the cassette. No building power connection needed.

Solar drive: up to 4 m (approx. 157 in) wide. Confirm size, sunlight and wind limits.

SIZE RANGE / ZIP 6

Up to 6 m wide / 3.5 m high

Approx. 236 in wide / 138 in high

Maximum area: **20 m² per shade**. Width, height and wind ratings depend on fabric, drive and installation. ZIP 6: up to WRC 6; solar operation has additional wind limits. Confirm regional options before ordering.
